

PICTO

*New anti-reflexive picture
Framing glass*

PICTO

*Clear view without
Contour deformation*

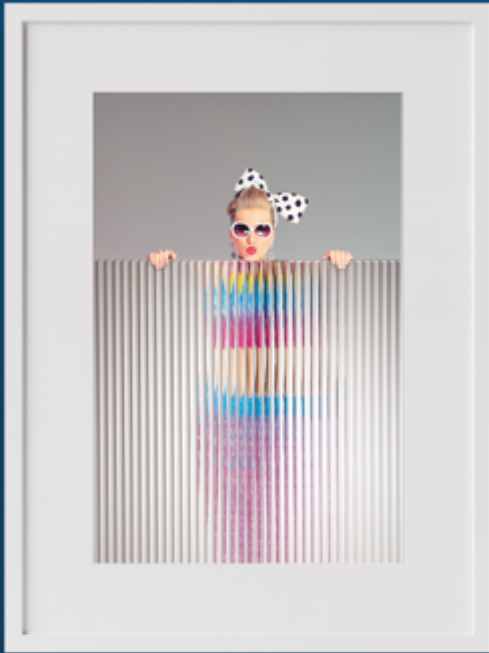

PICTO is two-sided anti-reflexive patterned glass for universal use. PICTO eliminates reflections without contour deformation and renders the full depth of colours.

A fine structure of 2mm glass enables to look at the picture from every angle, with no negative effects caused by reflections of the incident light, and in doing so it eliminates reflections and glow.

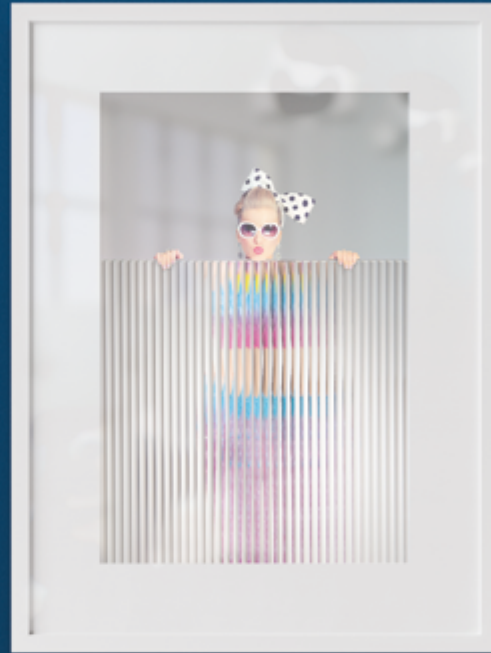

Choose the quality of PICTO!

PICTO GLASS

- Perfect sharpness
- No reflections

STANDARD GLASS

- Intense reflections
- Deformation of shapes and colours

*Maintain the depth
of colours in your
best memories.*
