

Lacquered glass
PLANILAQUE® COLOR-IT
BLACK&WHITE Collection

A duo of elegant glass and vibrant colour

The BLACK&WHITE lacquered glass collection constitutes the essence of elegance of interior arrangement, suitable for any type of interior.

Interiors filled with a tasteful duo of black and white will be appreciated by classic lovers as well as enthusiasts of a modern approach to interior design.

White, seemingly austere and cold, but in fact trendy and practical, constitutes a perfect base for any décor, particularly for the contemporary, Scandinavian, and minimalistic style.

Black is one of the most classic colours, more and more often used in interior design, which adds elegance and timelessness to building interiors.

Rooms dominated by black and white seem to have a certain order. Each item has its own place here. This colour duo adds lightness to building interiors and makes them seem everything but overwhelming.

You will find the classic colours of BLACK&WHITE in our offer of lacquered glass.

PLANILAQUE® COLOR-IT BLACK&WHITE is a combination of good style and elegance.

Such a duo is timeless. Black and white is one of the favourite motifs of architects and interior designers.

PLANILAQUE® COLOR-IT BLACK&WHITE lacquered glass combines colour vibrancy with a deep shade and elegance of glass.

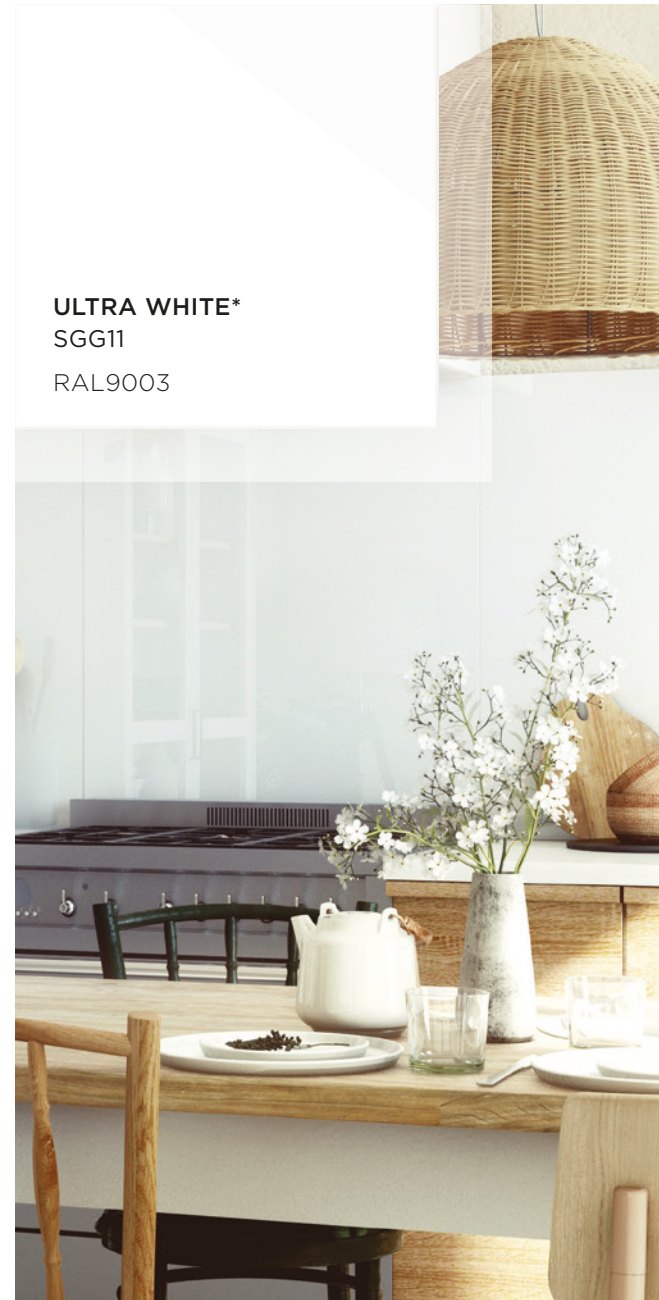

The BLACK&WHITE trend has a well-established position on the market. Nevertheless, new, fresh ideas constantly pop up that help to make this combination look exceptional and present black and white in yet another version.

And here is one of them!

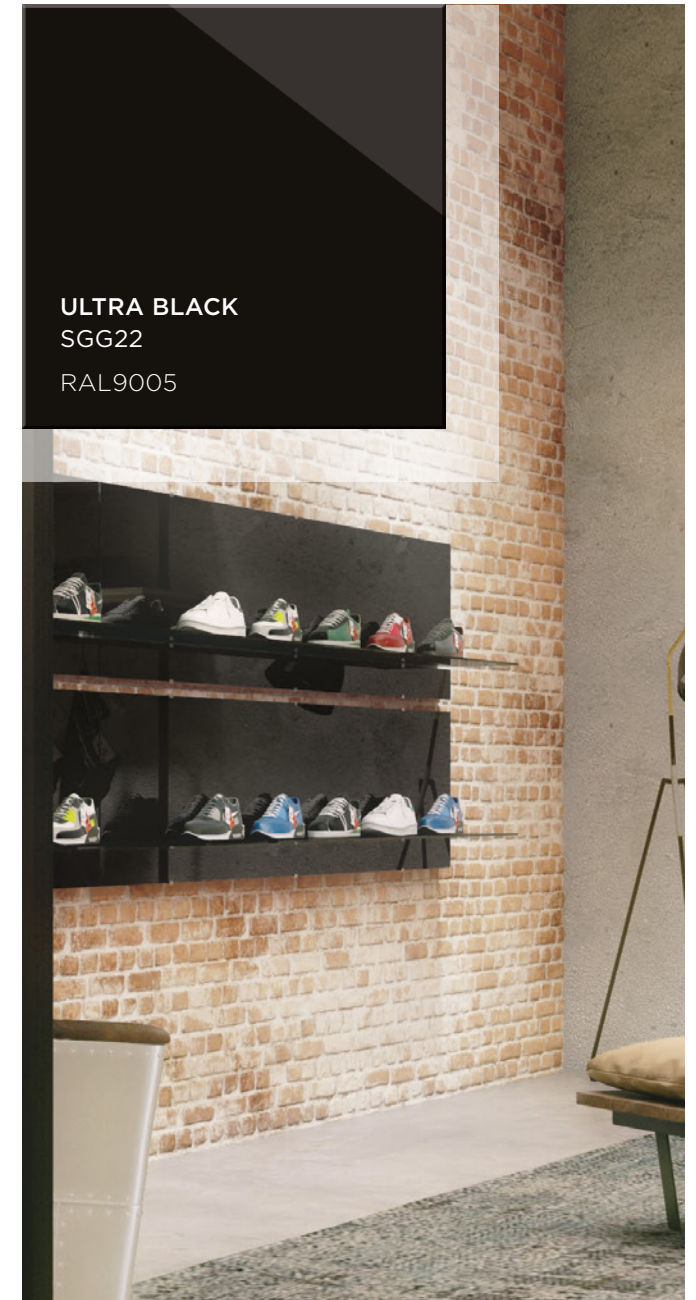

Elegance and sophistication, simplicity and modernity – that is what this glass is.

ADVANTAGES

PLANILAQUE® COLOR-IT lacquered glass has the best resistance to humidity on the market.

Each production batch is guaranteed to have appropriate colour intensity and be identical in shade.

Colour repeatability, appropriate thickness and hardness of the lacquer – these are the advantages of PLANILAQUE® COLOR-IT lacquered glass.

Its top-quality lacquer is environmentally friendly and has no effect on the quality of air in rooms as it is characterised by a very low level of emissions of volatile organic compounds (VOCs) and formaldehyde.

PLANILAQUE® COLOR-IT is very easy to maintain. It is enough to wipe it with a clean, soft cloth using standard glass cleaning products without abrasive elements.

APPLICATION

PLANILAQUE COLOR-IT will work perfectly in residential as well as commercial buildings: hotels, offices, restaurants, or healthcare institutions. Lacquered glass will infuse building interiors with vibrancy and light and will highlight their character.

Thanks to its durability and easy maintenance it can be a functional as well as attractive addition to any interior.
